

S3 -> Bucket Creation and checking connection of aws configure with EC2-server also connects nginx Server by VIVEK

First We created EC2-public and private servers and connected each other

The screenshot shows the AWS CloudShell interface with a terminal window. The terminal displays the following commands and output:

```
ubuntu@ip-192-178-10-82:~$ ls
ubuntu@ip-192-178-10-82:~$ vi vivek-private.pem
ubuntu@ip-192-178-10-82:~$ chmod 500 vivek-private.pem
ubuntu@ip-192-178-10-82:~$ ssh -i vivek-private.pem ubuntu@192.178.20.12
The authenticity of host '192.178.20.12 (192.178.20.12)' can't be established.
ED25519 key fingerprint is: SHA256:igb1pMQXK5JvE/18OVHUP1IW/y5M8pVE2r2D1F15bCo
This key is not known by any other names.
Are you sure you want to continue connecting (yes/no/[fingerprint])? yes
Warning: Permanently added '192.178.20.12' (ED25519) to the list of known hosts.
Welcome to Ubuntu 26.04 LTS (GNU/Linux 7.0.0-1006-aws x86_64)

applicable law.

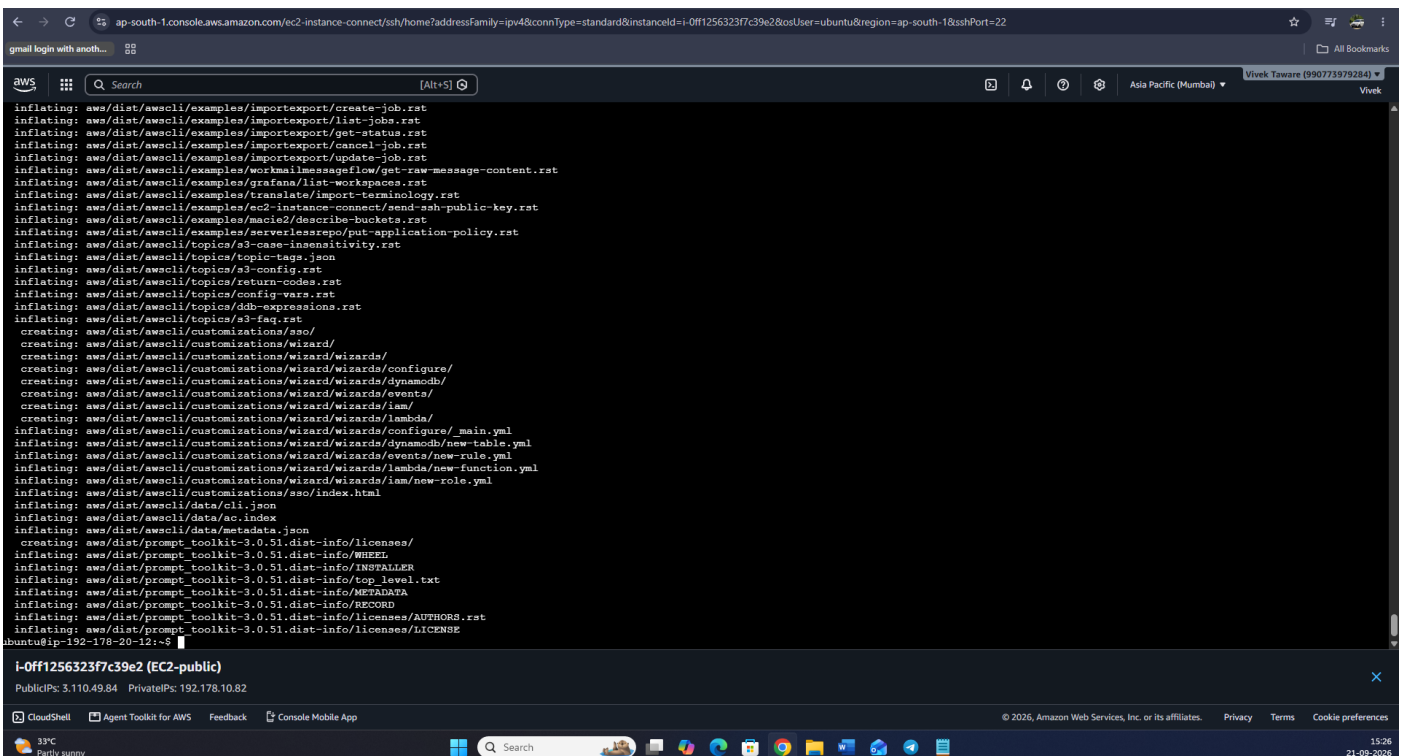

ubuntu@ip-192-178-20-12:~$
```

Below the terminal, the instance details for 'i-Off1256323f7c39e2 (EC2-public)' are shown, including PublicIPs and PrivateIPs.

Next We created S3 Bucket to check AWS connection

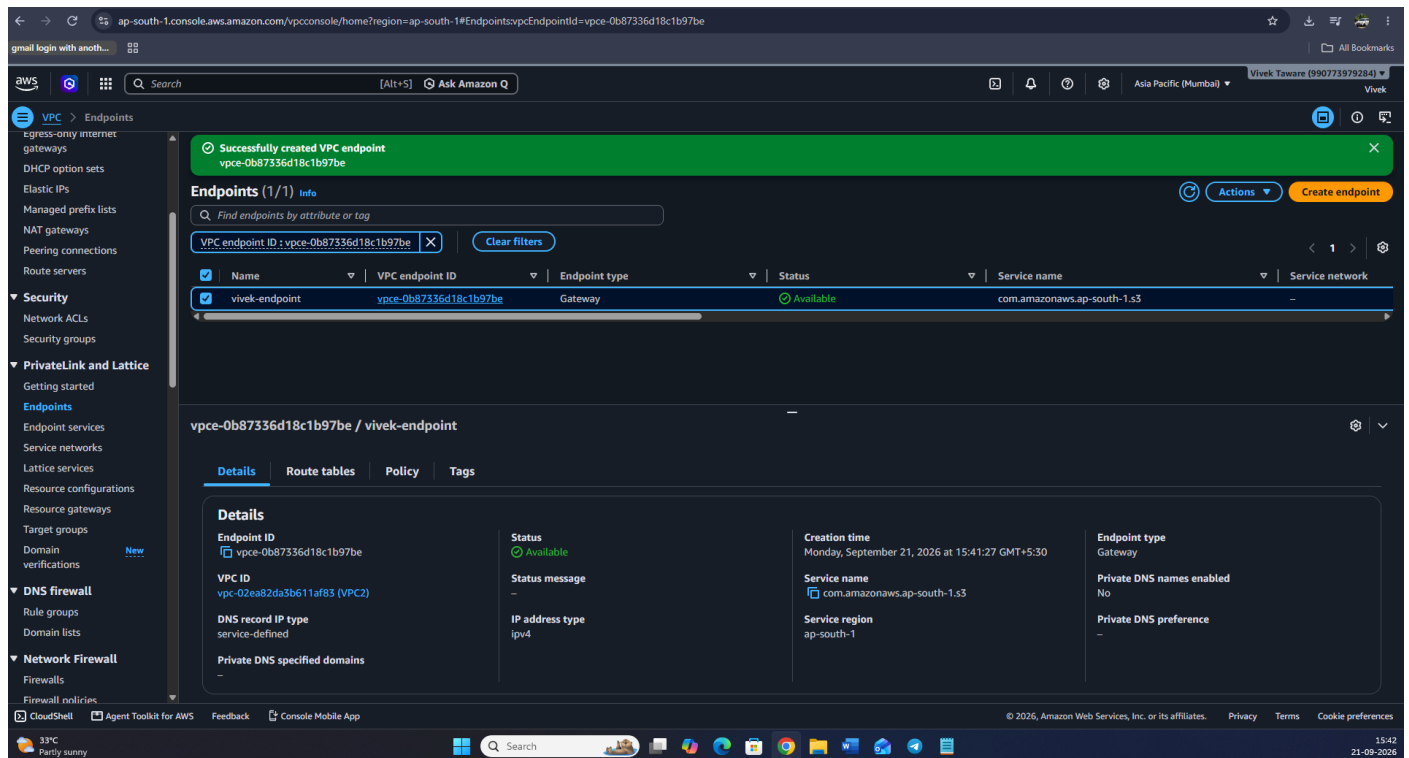

The screenshot shows the AWS S3 console interface. A green notification banner at the top states: "Successfully created bucket 'vivek-bucket21-09-26'". Below this, the bucket details for 'vivek-bucket21-09-26' are displayed. The 'Objects' tab is selected, showing a list of objects. The list is empty, with a message: "No objects. You don't have any objects in this bucket." The 'Upload' button is visible at the bottom of the list.

Create Endpoint and Connect with S3 class

1:- also select your VPC

2:- Select Your Route Table -private Route Table

NGINX connection With EC2 server

Hello from Nginx Server

Commands to connect with NGINX

```
#!/bin/bash
```

```
# Update packages
```

```
apt update -y
```

```
# Install Nginx
```

```
apt install nginx -y
```

```
# Start Nginx
```

```
systemctl start nginx
```

```
# Enable Nginx after reboot
```

```
systemctl enable nginx
```

```
# Create a simple web page
```

```
echo "<h1>Hello from Nginx Server</h1>" > /var/www/html/index.html
```
